

Anjali Sarawgi

Master's Student, LMU Munich

@ anjali.sarawgi9@gmail.com  github.com/anjalisarawgi  linkedin.com/in/anjalisarawgi  Google Scholar
 Munich, Germany

Education

July 2026 Apr 2023	Ludwig Maximilian University (LMU), Munich Institute for Statistics M.Sc. in Statistics and Data Science (Track: Machine Learning)	Munich, Germany
Jun 2018 May 2021	CHRIST (Deemed to be University) Department of Mathematics B.Sc. (Economics, Mathematics, Statistics), Grade : 1.26	Bangalore, India

Experience

– Dec 2024	Heidelberg Academy of Sciences and Humanities  [GitHub] Research Student (Master's Project) Advisors: Dr. Christof Zotter, Esteban Garces Arias Developed a transformer based handwritten text recognition (HTR) model for low-resource 18th and 19th century Old Nepali manuscripts with 95.1% character accuracy .	Heidelberg, Germany
May 2026 Aug 2025	Fraunhofer AISEC Institute for Applied and Integrated Security  [GitHub] Master Thesis Student Advisors: Johanna Baehr, Prof. Dr. David Rügamer Topic: Graph Neural Networks for Boundary Detection in Hardware Netlist Reverse Engineering Developed graph-based ML methods to recover subcircuit boundaries in flattened IC netlists (hardware reverse engineering), generalizing to entirely unseen, heterogeneous circuit designs . Built a full-graph GNN pipeline (PyTorch Geometric) scaling to 300K+ node circuit graphs, and identified the structural conditions driving model success vs. failure.	Munich, Germany
Sep 2025 Oct 2024	Institute for Statistics LMU, Munich  Research Student Mentor: Prof. Dr. Thomas Augustin Assisted with lecture material preparation for Statistical Inference Course (Bachelor's program), corrected student papers, and helped with literature searches and preparing supporting research materials.	Munich, Germany
Mar 2025 Oct 2024	Psychological Methodology and Diagnostic LMU, Munich  Research Student Mentor: Dr. Yannik Terhorst Worked on statistical analysis and statistical modeling for a meta-analysis of PTSD research, and feature engineering of mobile sensing data (Phone Study Project) to detect depression patterns from user behaviour.	Munich, Germany
Sep 2024 Mar 2024	Chair of Mathematical Foundations of AI LMU, Munich  [GitHub] Research Student Mentor: Sohir Maskey, Prof. Dr. Gitta Kutyniok Worked with Graph Neural Networks (GNNs) to (1) visualize loss landscapes to understand model behaviour using dimensionality reduction methods and, (2) implement experiments to study double descent phenomenon for benchmarked graph data and GNNs.	Munich, Germany
Jan 2023 Nov 2022	Bask Solution LLC Web Development Intern Designing and building an AI-powered conversational food delivery web app with Python and React JS.	Kathmandu, Nepal
Sep 2022 Jul 2021	Deloitte USI Associate Analyst Consulting (Strategy and Analytics) - AI and Data Engineering Worked on building and maintaining Master Data Management (MDM) pipelines for a global pharmaceutical client. Validated correct data flow to meet quality standards, implemented record-matching and merging logic, fixed workflow bugs.	Bangalore, India

Selected Projects

Adversarial learning: Multi-modal domain adaptation [GitHub] 2026

- Adapted a multi-modal CLIP (ViT-B/32) model to unseen visual domains of the DomainNet dataset with the Domain-Adversarial Neural Network (DANN) method, with t-SNE visualizations.
- Evaluated three adaptation strategies: zero-shot learning, fine-tuning, and DANN method.

Machine Learning Operations (MLOps) Project [GitHub] 2024

- Built and deployed a CNN-based sign language recognition model with a Dockerized FastAPI inference service and deployment on Google Cloud.
- *Technologies used:* Python (Pytorch), Git, Continuous Integration, Docker, Google Cloud Platform, FastAPI.

Awards

SAC Highlight, ACL 2026 Awarded by Senior Area Chairs at ACL 2026 for outstanding research on handwritten text recognition of historical Old Nepali manuscripts.

Spot Award, Deloitte USI 2022 Recognised for technical contributions to data pipeline development and testing for a global pharmaceutical client project.

Courses & Skills

Relevant courses: Supervised Learning, Deep Learning, Statistical Modelling, Optimization for ML, Generative AI and Visual Synthesis, Deep Learning for NLP, MLOps

Programming Languages & ML: Python, R, SQL, PyTorch / PyTorch Geometric, Open-CV, scikit-learn, Tensorflow

Tools & Frameworks: Git, Django, FastAPI, GCP, Docker, LaTeX, HTML/CSS, ReactJS (Basic), Linux (Ubuntu), Bash

Additional

Languages: English (Fluent), German (Learning), Nepali (Native), Hindi (Fluent)

Training Course: Python with Django (Advanced), IT Training Nepal, 2022
